

Expense Management System

Instructions: How to Run?

1. After you finish downloading the project, unzip the project file and head over to your XAMPP directory.
2. There you'll find a folder named "htdocs".
3. Inside the "htdocs" folder, paste the project folder (not the .zip one, but the extracted one).
4. Open your favorite browser; we recommend using Google Chrome or Mozilla Firefox.
5. Then, go to the URL "http://localhost/phpmyadmin".
6. Create a Database with a name that is provided inside the "01 LOGIN DETAILS & PROJECT INFO.txt".
7. Click on the "Import" tab and choose the database file (.sql) which is provided under the folder named "DATABASE FILE".
8. After setting up all these, go to the URL "http://localhost/[PROJECT_FOLDER_NAME]/"
9. All the login details are provided inside the project folder, check that out and enter them in order to use it.
